

US Maritime Information System & Merchant Vessel Database

Stand alone CD-ROM disks, containing database information obtained from the United States Coast Guard and the Department of Transportation.

U. S. Maritime Information System allows search capabilities across all four databases at once and is beneficial to:

- Marine Insurance Carriers
- Marine Surveyors
- Law Enforcement Agencies
- Loss Control Services
- Marine Lenders
- Investigators
- Maritime Attorneys
- Research Institutes, etc.

Our products use a simple "point and click" design which is enhanced by additional information in popup windows, extensive indexes, and a handy user guide. All information is from United States Government sources.

MIS 2008.2

US Maritime Information System combines the following:

US Merchant Vessel Documentation

Database - All Documented Vessels of the US, Commercial/Yachts, including all of the vessel particulars, managing owners, etc.

Data through June 30, 2008.

Manufacturer Identification Code Database (MIC) recreation only - Manufacturers/Boat Builders, including addresses, and ID codes, business histories - 25 year database

Manufacturer's Defect Notification & Recall Campaign Database - recreation only. Recall notices to marine manufacturers on vessels and machinery.

Recreational Boating Accident Reports

(data through 2004) - 18 years of Coast Guard boating accident reports, including causes, nature, & extent of damage, including weather and sea conditions.

MVDB 2008.2

Merchant Vessel Database - data through June 30, 2008

MVDB on CD-ROM lists over 300,000+ US Documented Vessels. This program allows for extensive searching, browsing, data handling, and printing of mailing labels. MVDB includes all Documented Vessels of the United States and the program is designed specifically for target marketing to the marine community.
